

Press Release April 28, 2022----

McCloskey Partners LLC, a national Human Resources, Recruiting and Training firm, is thrilled to announce that we continue to be recognized among the 13 million women-owned businesses in the United States! We've achieved our re-certification through the Women's Business Enterprise National Council (WBENC), the nation's largest third-party certifier of businesses owned and operated by women in the US.

This world class, gold standard of certification involves a meticulous process designed to confirm that the business is at least 51% owned, operated, and controlled by one or more women.

Many women-owned businesses were hit hard during the pandemic, and it became increasingly vital to come together, promote one another, offer assistance as we tackled challenges, and celebrate the victories. It is essential to acknowledge each other and our unique contributions to the diversity of the supply chain. We truly appreciate the support, recognition, and opportunities provided by WBENC, encouraging the advancement of all female entrepreneurs.

We are grateful for all the professional connections we've made and retained throughout these past few years, as well as the mentorship and resources shared by many organizations to help us thrive during this time. We continue to stay committed to doing what we can to elevate other small businesses and contribute to their continued growth and success.

We also remain committed to our clients and exceeding their expectations as they maintain or refine their people operations strategies. Your employees are not "resources", rather, the heart of your organization. They are the ones driving your business forward to achieve the defined goals and outcomes. The ability to attract, enhance, and retain top talent is an essential component to achieving increased profitability, remarkable results, and the coveted status as "a best place to work".

We look forward to continuing to provide you employment related policies/procedures/standard operating procedures, reduced liability, increased profitability, minimized employment risks and a streamlined administrative process as a certified Women's Business Enterprise in 2022 and beyond.
